

## Downloadable files produced by ESKAPE Act

### 1. zip file with activation analysis results

File name	Explanation
01_README.pdf	this document
GO_Boxplot.pdf	Boxplot of all <b>significantly</b> activated (magenta) or repressed (green) GO terms. This file will not be generated if the analysis did not yield any significant GO terms with FDR < 0.05.
GO_Results.csv	Table of <b>all</b> results from the GO term activation analysis with estimates (< 0.5 = repressed, > 0.5 = activated), median fold changes, p-values from the binomial test and FDR-corrected p-values.
KEGG_Boxplot.pdf	Boxplot of all <b>significantly</b> activated (magenta) or repressed (green) KEGG pathways. This file will not be generated if the analysis did not yield any significant KEGG pathways with FDR < 0.05.
KEGG_Results.csv	Table of <b>all</b> results from the KEGG pathway activation analysis with estimates (< 0.5 = repressed, > 0.5 = activated), median fold changes, p-values from the binomial test and FDR-corrected p-values.

### 2. zip file with Pathview results (only if optional Pathview analysis was performed)

File name	Explanation
xyz00000.pathview.png	one file for each of the selected KEGG pathways showing all genes on a given pathway with upregulated genes highlighted in shades of magenta and repressed genes in shades of green
